Each year, the University of North Alabama is pleased to publish *Profiles in Excellence*. This publication highlights the many noteworthy achievements of the university faculty, broadly categorized and defined to include artistic endeavors, creative initiatives, original research, scholarly books, articles, and presentations, funded grants and awards, and/or academic services.

Through *Profiles in Excellence*, the university recognizes the significant accomplishments of our faculty; the publication serves as an annual expression of appreciation for their contributions to their respective academic disciplines, and to the university. Their dedication to very high quality work is evident in these pages, and the university derives considerable benefit as a result.

During 2013-14, the university witnessed its second consecutive year of substantial growth in our Research Days; we continue to experience an increase in our faculty's engagement of undergraduate students in their research projects. Recognition is given to the many members of the faculty whose involvement of undergraduate students has led to an excellent two-day event, which includes poster sessions, paper presentations, and for the first time in 2014, a very highly anticipated and well attended oral thesis competition.

The faculty's growing efforts to conduct research and pursue creative expression keeps the intellectual climate of the university fresh and alive. *Profiles in Excellence* captures these efforts. Thank you for your many contributions to the University of North Alabama.

JIM F. COUCH OUTSTANDING SCHOLARSHIP/RESEARCH AWARD

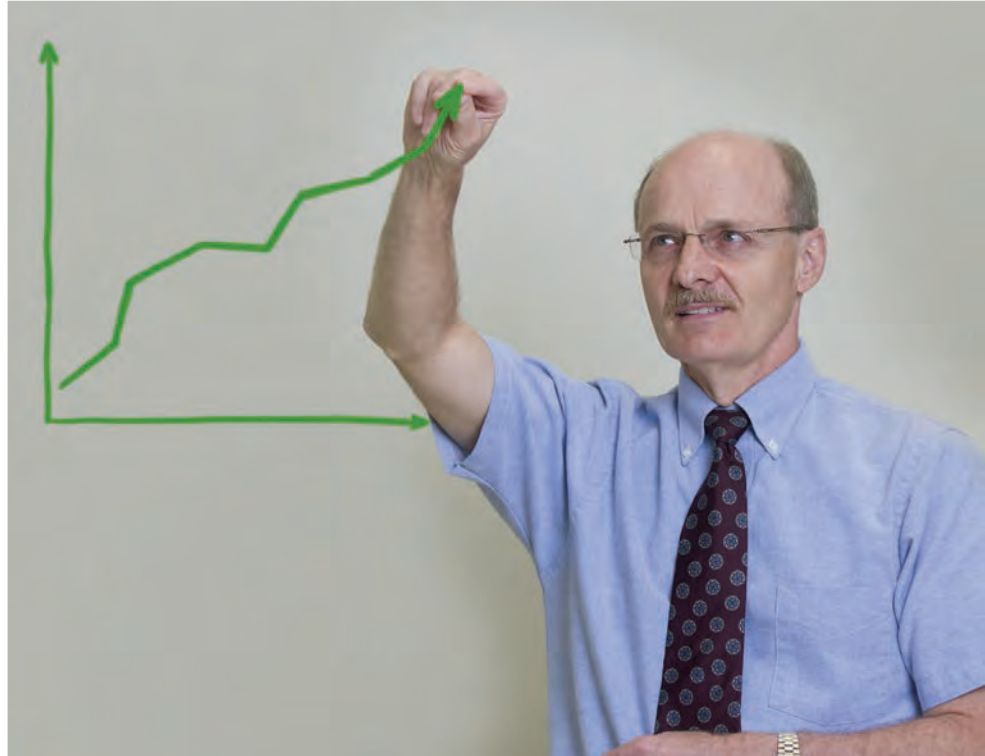

KEITH T. JONES, Professor of Accounting, B.S., 1984, Murray State University; M.S., 1996, The University of Texas at Arlington; Ph.D., 2001, University of Kentucky.

Dr. Keith Jones is a professor in the Department of Accounting and Business Law, having joined UNA in 2010 after spending the previous five years at Illinois State University in Normal, Illinois. He teaches in the areas of auditing and managerial accounting. Keith has also taught at Eastern Kentucky University in Richmond, Kentucky and at Ball State University in Muncie, Indiana. Prior to entering his doctoral program at the University of Kentucky, he worked for over 10 years as an auditor for the Department of Defense.

Keith's interest in being a university faculty member began in the early 1990s, as part of a struggle to find the best way to apply his background and interests over the long term. Since no one from among his family or friends had ever taken the academic route, it took some years to come upon the idea; throwing away a stable government auditing career, salary and benefits and going back to school for several more years did not immediately rise to the surface as the most obviously desirable thing to do! Through various life experiences, being a college professor began to look like a potential match. A taped message on Psalm 90 and the bestselling book by Stephen Covey, *The Seven Habits of Highly Effective People*, then helped to provide the push that was needed. Keith and his wife, Kay, moved from Belleville, IL to Fort Worth, Texas in 1993; he received his masters' degree in 1996 from the University of Texas at Arlington while still working for the government, then left the government in 1997 to enter a full-time doctoral program. He received his Ph.D. in 2001, nearly 10 years after the original seeds of thought were planted. Whatever other influences he has had, he knows that he would be nowhere without the support of his wife, parents, and others who have believed in and invested in him.

While the idea of teaching college provided the primary impetus for becoming an academic, Keith's first publication

in approximately 2002 gave him the "research bug". He finds research to be his way of staying fresh and connected to the accounting profession, while providing the information and an outlet for a writing passion. Therefore, research is viewed as a vital companion to teaching; a good week must include some writing! He has presented research at national and international conferences and has published in highly-recognized journals. His interests are broad within the overall category of behavioral research. Recent projects have

involved examining misperceptions about the accounting profession, the relative effectiveness of online accounting education, and factors associated with recruiting accounting faculty. Outside of writing, however, anyone who knows Keith knows that his strongest interest (obsession) these days is distance running. One of his favorite running-related quotes is: "Your body will argue that there is no justifiable reason to continue. Your only recourse is to call on your spirit, which fortunately functions independently of logic." (Tim Noakes)

"So teach us to number our days that we may present to Thee a heart of wisdom." — Psalm 90:12
"Only those who will risk going too far can possibly find out how far one can go." — T.S. Eliot

LAWRENCE J. NELSON OUTSTANDING TEACHING AWARD

JEFFREY R. BIBBEE, Associate Professor of History, B.A. 1997, History, Auburn University; M.A. 1999, History, Auburn University; Ph.D., 2008, History, King's College, London.

While as a child, **Jeffrey Bibbee** and his siblings lamented his parent's need for "learning vacations" instead of time at the beach like his other friends, this time spent visiting historic sites, museums and battlegrounds provided a foundation for a lifetime of learning and a firm belief that each and every space in which we find ourselves can be a classroom. "Every time we visited yet another historic site I was curious as to what really happened there and why and how this place was preserved." It is with this same curiosity about the subject and his students that Bibbee approaches his courses in World History, British History, History Education and Study Abroad.

In his World History courses, Bibbee has students explore primary sources to understand not just the craft of the historian but also to glimpse the lives of the people his students are studying. Working with the UNA Center for Writing Excellence, students read ancient and contemporary sources, secondary literature and modern media to analyze documents for historical significance but also to enlighten their views on contemporary cultural issues. In upper level British History courses, Bibbee continues a focus on research and writing by exploring deeper questions about motivation and behaviour, challenging students to examine why and how events unfold and what forces shape the development of previous and current societies. All of this comes to its climax in the UNA London Study Abroad program which provides students with an opportunity to explore unique environments beyond the traditional classroom thereby facilitating the development of critical thinking and research skills in one of the world's academic capitals. This program takes students to London for one month of research and exploration. Students work at the British Library, attend theatrical performances and visit numerous historical and cultural sites. The study abroad experience culminates in a substantial research project based

on their London archival research. All of these teaching experiences are based on his personal philosophy that teaching is a student-orientated experience in which students are empowered by the knowledge and skills gained in the classroom to improve their lives and examine their world in critical and creative ways.

Bibbee was born in Oklahoma and moved to Alabama as a child. He is a graduate of Auburn University with a Bachelor of Arts and Master of Arts in History. Following his MA, Bibbee taught elementary and middle school

in Alabama. He completed his PhD in History at King's College, University of London, in 2008, and began teaching at UNA that autumn. While at UNA, he has served on various committees, worked with local historical groups and served as the Department of History and Political Science Director of Graduate Studies. Along with Dr. Lesley Peterson, Associate Professor of English, Bibbee founded the UNA Centre for British Studies and leads the UNA London Study Abroad Program.

ACADEMIC AFFAIRS AWARD FOR OUTSTANDING SERVICE

TERA R. KIRKMAN, Associate Professor of Nursing, B.S.N., 1998, University of North Alabama; M.S.N., 2003, University of Alabama at Huntsville; Ed.D. in nursing education, 2011, University of Alabama.

Dr. Kirkman worked as a patient care manager for five years at Eliza Coffee Memorial Hospital in Florence. Her management responsibilities included staffing and scheduling, budget preparation and evaluation, evaluation and counseling of employees, adhering to reduction in workforce policies, leading and serving as a committee member of various interprofessional performance improvement and Joint Commission accreditation planning committees. She was instrumental in the physical redesign, merger, and restructuring of patient care in ambulatory services, perioperative services, and the infusion clinic. She later joined the administrative team at J.W. Sommer Rehabilitation unit and practiced in many capacities (i.e., nurse liaison, case manager, and clinical nurse).

Dr. Kirkman has been a member of the College of Nursing at UNA since 2006. During that time she has taught and functioned as the leadership and management in nursing course coordinator. Since her tenure, Dr. Kirkman has served as the clinical instructor for the leadership and management, adult health nursing I, and community health nursing courses.

Dr. Kirkman's research interest has been in the area of high-fidelity simulation. In 2012, she was the recipient of the "Excellence in Research Award" by the International Nursing Association for Clinical Simulation. The International Journal of Nursing Education Scholarship published her article titled *High Fidelity Simulation Effectiveness in Nursing Students' Transfer of Learning*. Dr. Kirkman has also investigated such research topics as: effectiveness of patient simulation, the effectiveness of high fidelity simulation, and the impact of a mileage club on the cardiovascular health of school as children. She has served as a peer reviewer for the International Journal of Nursing Education Scholarship, and has presented her research at local, regional, national, and international conferences.

Dr. Kirkman coauthored the \$2.1 million dollar Scholarship for Disadvantaged Students HRSA grant (also known as Project OPEN) and in September 2012 she began serving as the project director for this grant while continuing to function as instructor/course coordinator and a clinical instructor. Approximately 133 students have been recipients of this scholarship program. As project director her duties include but are not limited to the following: assessment of student needs (learning and financial), conduct monthly one-on-one advisement meetings with half of the scholarship recipients to evaluate their academic performance, plan and conduct monthly student educational sessions for pre-nursing and nursing students, supervise and approve payroll for the part time administrative assistant, management and evaluation of budget for the scholarship program, and program evaluation and report dissemination to HRSA. She has also traveled to numerous high schools in Alabama and Tennessee to recruit students for the program.

Dr. Kirkman has also made significant service contributions in the Shoals and UNA community. She was a member of the board of directors and advisors for Westminster Interfaith Caring Place. She serves as vice president of Omicron Upsilon chapter of Sigma Theta Tau International Nursing Honor Society. Dr. Kirkman also developed guidelines for the Mother Lizzie Scholarship program at Galilee Missionary Baptist Church, in Florence. As faculty advisor to the Student Nurse's Association at UNA, she collaborated with her fellow advisors to initiate and implement the first College of Nursing SNA Scholarship.

Tera has been married over fifteen years to her husband Dr. Eric Kirkman, who is also an alumnus of UNA. They have two children Jalen and Justin Kirkman.

To know wisdom and instruction, to understand words of insight, to receive instruction in wise dealing, in righteousness, justice, and equity, to give prudence to the simple, knowledge and discretion to the youth— Let the wise hear and increase in learning, and the one who understands obtain guidance. — Proverbs 1:1-7

ACADEMIC AFFAIRS AWARD FOR OUTSTANDING ADVISING

MARTHA S. ROCK, Professor of Nursing, B.S.N., 1968, Alderson-Broaddus College; M.S.N. 1973, The Ohio State University; Ph.D., 1992, University of Delaware.

Dr. Rock believes the essence of academic advising is assisting the student in the discovery of choices that lead to the path of educational aspirations and life-long learning. The net result of these efforts prepares the student for success in their chosen profession.

Dr. Rock's varied life and professional experiences have provided her opportunities to develop empathy and understanding of students' unique advising needs. Dr. Rock's first nursing position was working on a medical-surgical unit at Good Samaritan Medical Center in Zanesville, Ohio. While there, she was asked if she would teach Medical-Surgical Nursing for the remainder of the summer session. This was a great experience and helped reinforce the need and desire to expand her nursing role to include that of nurse educator.

She is a strong advocate for international students and understands what it is like to be in a new country and adapting to a new culture. After graduation, she married Bob, and they lived in Japan for two years. Being immersed in an Asian culture, Martha acquired an understanding of their history, customs, language, food and values as well as military culture, which has been beneficial when advising current and ex-military nursing students. While in Japan, Dr. Rock established an independent nursing practice with emphasis on client teaching, family health care needs and assisting families with the transitions they experienced living in a new culture. The clients were all U.S. military families.

In 1973 Martha completed her Master of Science in nursing degree from The Ohio State University. She returned to her alma mater of Alderson Broaddus College and taught from 1973-1977. Dr. Rock then served as Department Chairperson at West Virginia University, revised the advisement program to involve all nursing faculty in academic advisement, and became involved in post-masters course work in Higher Education Administration. After this, Martha taught for the next ten years at the University of Delaware in the College of Nursing. She helped to facilitate revision of the curriculum, established a recruitment plan and became coordinator of advisement. Martha pursued her Ph.D. in Family Studies at the University of Delaware and completed it in 1992.

Dr. Rock then taught at Ohio University for the next 10 years in the RN to BSN Program. She continued her interest

in advising students and established a recruitment plan that included "Lunch with the Advisor" at the local hospitals.

In 2001 Dr. Rock accepted her current position at UNA. Dr. Rock has served on various committees focused on the improvement of academic advising at UNA, including the Ad Hoc Committee on Advising and the Academic/Student Affairs Shared Governance Sub-Committee charged with task of developing a university advising mission statement and goals. She is an integral part of advising for freshman

and transfer SOAR sessions, Scholarship Receptions, Honors Receptions and new student orientations. Dr. Rock initially advised all international students interested in nursing. Martha prepared presentations for faculty to assist them in being advisors for international students. She is a resource for all advisors.

Dr. Rock has a strong personal philosophy that caring is the essence of nursing. She has transferred this philosophy of nursing to her role of nurse educator and academic advisor. Dr. Rock cares for and about her patients, her students, her advisees and her colleagues.

*"The essence of Nursing is Caring."

ELEANOR P. GAUNDER PHI KAPPA PHI EXCELLENCE IN TEACHING AWARD

STEPHANIE L. MONTGOMERY, Instructor in Speech Communication, B.S., 1996,
University of North Alabama; M.A., 2005, The University of Alabama.

Stephanie Montgomery definitely loves her job. She also believes that obstacles are going to arise, but seemingly unsurmountable odds are possible to beat. Throughout her educational pursuit she discovered persistence in her fight against those who wanted her to fail, strength through positive role models who desired to see her succeed, and determination through the unconditional love of her children who inspired her to keep going when life got rough. This all culminated in the most rewarding job she has ever had, teaching. "I didn't choose to teach because it was my career goal. As a single mother of three, I needed the income. I am an introvert and incredibly shy. I'll never forget the first day and the first class I taught. I wore a suit, it was an uncomfortable suit; it felt like it was choking me at every seam. I was scared to death, which only made it that much more uncomfortable. But it was probably just my nerves. Funny thing is I was so nervous I forgot to turn the lights on. We went over the syllabus in an extremely dark room. I laugh about that now." She knows that anxiety can often be a huge inhibiting factor for students. But, the ability to speak well and with confidence makes a huge difference in an individual's career, regardless of the field one is in. "I know that in every student there is an amazing speaker; some are imprisoned by the walls of anxiety." She believes that everyone faces obstacles that distract from personal goals and dreams. Some are anxiety, some are true monsters, and sometimes they are just life circumstances. It is easy to forget about goals for a while, but it is important to come back to them and when necessary, power through the roadblocks.

Stephanie has been on campus at the University of North Alabama for over twenty years. She moved to Alabama to work on her baccalaureate in 1993 and graduated from UNA in 1996 as a double major in Communications and Psychology. After graduation she began working toward her masters in counseling, but after going through a series of personal trials, and a desire to teach speech, she commuted to Tuscaloosa for her masters in Communication Studies at the University of Alabama. "I did it one class at a time. Many days began at 4:00am and ended after 10:00pm." She finished her masters in 2005 and landed a full time position at the University of Alabama in Huntsville. "I really enjoyed my time there, but when the job came open at UNA, I was ready to come home." As a second year PhD student at the University of Memphis, she is commuting once again. This time, she has the love and support of an even larger family, five children and eleven grandchildren. Her husband travels to Memphis with her when he can to ease the burden of the long drive. He is undeniably her best friend. She knows that behind a good teacher are fabulous students. She is genuinely concerned about and cares for students. "I am deeply committed to the student body at UNA; they are a priority to me. We have the best - they are incredibly enjoyable, intelligent, likeable and pleasant to be around. Plus they make me laugh and even sometimes cry (not in a bad way though). I never would have imagined being honored with such a huge award for something I love so much. I am so thankful and so appreciative."

*"Choose a job you love, and you will never have to work a day in your life."
