A word from our Dean

We Appreciate Our Military Students

by Dr. Carmen Burkhalter, Dean

It seems fitting that as we move into the Holiday Season, we appreciate our military. Currently, UNA has over 300 veterans, military dependents, active-duty, National Guard, and Reserve members attending as undergraduate or graduate students. Nationally, it is estimated that by the year 2020, over 1.2 million veterans will be eligible to use their GI Bill to further their education. What does this mean for UNA? Before delving into the realities of military and veterans in college, let's acknowledge the geographical disproportion of military service. The "south" makes up 34% of the US population but veterans from Southern states make up 44% of the recruits. Interpretation suggests that universities in the south, such as UNA, have an imperative to create a positive military/veteran climate. We must do everything we can to enhance the cultural transition back home. This means universities supporting advisors who are knowledgeable about tuition assistance, counseling, student health, career counseling, disability services, retention efforts just to name a few.

Congratulations Graduates!

COAS News

Academic Updates

By Dr. Sara Lynn Baird, Associate Dean

The College of Arts and Sciences faculty have been actively engaged in curricular innovations, online course development, graduate degrees, unique collaborations, international connections, and experiential learning, which all offer exciting opportunities for our current and future students.

This fall COAS welcomed the faculty in the culinary, fashion merchandising, hospitality management, and interior design areas who have been working diligently to develop new curricula which will result in full majors in each area. Fall 2018 will witness the first graduates in the Electro-Mechanical Engineering Technology curriculum, and the department has recently recorded 100% employment prior to graduation for the first

graduates. The newly available option in Chemical-Engineering is being led by new faculty member Dr. Jonathan Sullivan. The major in Geographic Information Services (GIS) major has been granted STEM designation, and a restructured curriculum in this major incorporates current trends in the academy and industry.
