

Training Announcement

Alabama Speedball

The Alabama Impaired Driving Enforcement Program will be conducting training on Recognizing Stimulant and Narcotic Impairment

TRAINING DATES:

TRAINING TIMES:

TRAINING SITE:

This **free** course is designed to teach officers about cues which may emerge when contacting a driver impaired by Central Nervous System Stimulants or Narcotic Analgesics. Both drug categories and their combination are frequently observed in drugged driving cases in Alabama.

At the conclusion of this course, officers will be able to better recognize the different types of CNS Stimulants and Narcotic Analgesics as well as common methods of administration, duration of effects, and other signs and symptoms of impairment which may emerge during traffic contacts.

Topics Include:

- Recognizing common drugs
- Impairment clues presented by users
- Drug methods of administration and duration of effects
- Field sobriety tests and their relationship to impairment by drugs
- How to properly investigate, document and prepare effective cases for prosecution

Audience:

This course is intended to most greatly benefit patrol officers, DUI investigators, Traffic Homicide Investigators, prosecutors, and judges who would like to learn more about drugged driving.

****Attendance is limited to APSOTC certified law enforcement and active judges and prosecutors.****

Course Length:

Four (4) hours. Approved for 4 APOSTC CEUs.

Register by Clicking Here or by Visiting aidep.alea.gov.

For more information contact:

Sgt. William Frederick
