New Guidelines for anyone on campus at UNA:*

- Vaccinations are strongly encouraged. All students, faculty, and staff are urged to get the COVID-19 vaccination, either on campus at UNA or through a healthcare provider of your choice.

- Masks are optional inside campus buildings and facilities for fully vaccinated individuals. Beginning immediately, the University of North Alabama will shift to personal responsibility in the fight against COVID-19.

- Masks will be required in some offices where posted. Based on current guidance, there are some areas on campus that will require masks, such as Health Services, Kilby Laboratory School, UNA Transportation, and other areas where posted.

- Classrooms, offices, and other facilities will operate at normal capacity, however, individuals are asked to be mindful of personal distance.

- Use UNA Healthcheck daily before coming to campus. For both fully vaccinated and unvaccinated individuals, stay home if you are not feeling well and contact Health Services at 256-765-4328. Utilization of the UNA Healthcheck Passport will continue. Presentation of a green Passport may be required for entrance to some classrooms and campus events.

*As per ongoing guidance from the Centers for Disease Control and the Alabama Department of Public Health, social distancing must be maintained and cloth face coverings must be worn indoors if an individual is not fully vaccinated. Vaccines are offered through University Health Services by calling 256-765-4328.
